## **DETAILED ACTION**

### **Allowable Subject Matter**

1. Claims 1 - 19 and 21 - 66 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 24 and 27, a review of prior art failed to make obvious, disclose or fairly suggest a mass spectrometer comprising an input vacuum chamber comprising at least one AC ion guide having a plurality of electrodes having apertures, said apertures aligned so that ions travel through them as they are transmitted by the ion guide and at least 90% of the apertures are the same size and 90% of the plurality of electrodes are connected to an AC generator.

Regarding independent claims 33 and 60, a review of prior art failed to make obvious, disclose or fairly suggest a mass spectrometer comprising an input vacuum chamber comprising at least one AC ion guide for transmitting ions wherein the ion guide comprises two interleaved comb arrangements, each said comb arrangement comprising a plurality of electrodes having apertures.

Claims 2-19, 21-23, 25 and 32; 26; 28-31; 34-59; and 61-66 are allowed by virtue of their dependence upon claim 1, 24, 27, 33 and 60 respectively.

Art Unit: 2881

With respect to the provisional double patenting rejection made in the previous office action, the arguments are persuasive. Since the application serving as the basis of the provisional double patenting rejection is abandoned, the rejection is withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
